Director's message to the CEMFI community in support of Ukraine

I am writing to share with you my outrage and distress about the invasion of Ukraine by the Putin regime, which has caused countless victims, Ukrainian and Russian, and led to a mass migration of Ukrainian citizens. It is shocking to see, once again, unprovoked military aggression to a European country.

Our immediate concern is the wellbeing of our community. Please do reach out if you need to talk about your personal situation or if you are worried about others, in particular those with connections with the conflict region.

I would also like to express our support for the Ukrainian people, and would appreciate any suggestions about how we could help in these critical moments.

Rafael Repullo
Director
