

## Additional Information on Other Datasets

### Indonesia Database For Policy And Economic Research (INDO-DAPOER)

The World Bank's INDO-DAPOER dataset contains relevant economic and social indicators at the district-level, which span across four main categories: fiscal, economic, social and demographic, as well as infrastructure. This dataset is updated on an annual basis. The current time coverage is 1976-2016.

Users can find more information about as well as download the dataset here:

<https://datacatalog.worldbank.org/dataset/indonesia-database-policy-and-economic-research>

### Badan Pusat Statistik (BPS) – Statistical Office of Indonesia

BPS provides a large number of datasets covering relevant economic and social indicators at various levels of spatial aggregation and covering different time periods. Here is an overview of the datasets available at BPS:

Pendataan Potensi Desa (PODES) – Village Census: the Indonesian village census data is available for the years 1976, 1977, 1980, 1983, 1986, 1990, 1993, 1994, 1995, 1996, 2000, 2003, 2005, 2008, 2011, 2014.

Survei Sosial Ekonomi Nasional (SUSENAS): this household survey data is available for (almost) every year in the period between 1979 and 2017. There is also a panel-version of this dataset for the time period 2002 until 2010.

Sensus Ekonomi – Economic Census: the Indonesian Economic census is available for the years 1996, 2006 and 2016.

Survei Tahunan Perusahaan Industri Besar/Sedang (IBS) – The Manufacturing Survey for Large and Medium Enterprises: the manufacturing survey is available for every year in the period between 1975 and 2015.

Survei Industri Mikro dan Kecil Tahunan (IMK) Tahunan – Survey of Small and Micro Enterprises: this survey is available for every year in the period 2009 to 2015.

Researchers can contact BPS regarding price inquiries and in order to purchase access to these data sets using the contact form provided on the following webpage:

<https://www.bps.go.id/forum>

They typically respond within 5 business days. You can request the price list of the different datasets, the questionnaires, and sample of the datasets. You can purchase entire datasets or selected variables (which considerably reduces the cost).
